Gentlemen:

As per conversations and meetings during the month of January 1995, in particular the meeting on January 18, 1995, it is the Department of Energy's (DOE) understanding that the Industrial Area Surface Water and Sediment Field Sampling Plan is verbally approved in its current form. It is further understood that due to the current workloads at the Colorado Department of Public Health and Environment (CDPHE) a formal letter could not be provided at this time.

If we understand CDPHE correctly, it is DOE's intention to begin field sampling on January 30, 1995, under this verbal approval. Please inform us by this date so that we do not implement field work that is not approved. Even though we are starting field work based on verbal approval, it is DOE's expectation that under terms of the Interagency Agreement that a formal letter of approval for the Industrial Area Surface Water and Sediment Field Sampling Plan will be received from CDPHE. The formal response will also complete our documentation of this project.

Thank you for your cooperation in this effort and for your expedited review of this document. If you have any questions, please call Regina Sarter at 966-7252.

Sincerely,

*Steven W. Slaten*
